YOU'LL LEARN SOME GOLDEN INFORMATION!

Description: At birth the human mind is ready to absorb and integrate knowledge, while the body is ready to move. By using songs with carefully chosen lyrics, and age appropriate movement, we are able to instill the first positive messages about one's self, others and the world. Participants will review the stages of development from birth to three years old, learn related songs and movement, and explore ways to bring the positive application of early childhood research to the child.
